Foreword

YD/T 7025-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 1 June 2026, with effect from 1 September 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 33.050; CCS M30.

1 Scope

YD/T 7025-2026 defines the terms and definitions related to tactile and multi-modality services in the mobile internet environment. The terms cover basic definitions, service types, terminal devices, key technologies and application scenarios. Tactile services transmit the sense of touch over the network, and multi-modality services combine several kinds of sensory information such as sight, sound and touch. The document applies to the preparation of technical documents in the field of tactile and multi-modality services and related areas.

The vocabulary is useful to standards writers, equipment manufacturers, service providers, researchers and translators who need consistent terminology in this field. It is a voluntary industry standard, as shown by the /T in its code. It was approved by the Ministry of Industry and Information Technology, issued on 1 June 2026 and takes effect on 1 September 2026. It is a new standard.
