Foreword

YD/T 7067-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 1 June 2026, with effect from 1 September 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 33.180.01; CCS M42.

1 Scope

YD/T 7067-2026 defines the terms and abbreviations for preconnectorised optical distribution network cabling systems. It specifies the structure of the cabling system, the requirements for optical fibres and cables, the requirements for optical fibre connectors, the attenuation of optical fibre links, the test methods and the management requirements.

The document applies to the design, production, installation and acceptance testing of preconnectorised optical distribution network cabling systems. It is used by cabling product manufacturers, network designers, installers, operators and test laboratories. It is a voluntary standard, as shown by the /T in its code. It was approved by the Ministry of Industry and Information Technology under the China Communications Standards Association, issued on 1 June 2026 and takes effect on 1 September 2026. It is a new standard.
