Foreword

YD/T 7073-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 1 June 2026, with effect from 1 September 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 35.020; CCS L70.

1 Scope

YD/T 7073-2026 defines the basic terms of artificial intelligence security and governance, together with the terms and definitions for intrinsic security, derived security and application security. It gives a common vocabulary for the field.

The document applies to activities in the field of artificial intelligence security and governance, namely research and development, deployment, operation, supervision and management. It is used by AI developers and operators, security teams, regulators, researchers and anyone who writes or reads documents in this area. It is a voluntary standard, as shown by the /T in its code. It was approved by the Ministry of Industry and Information Technology under the China Communications Standards Association, issued on 1 June 2026 and takes effect on 1 September 2026. It is a new standard.
