What this standard covers

This standard specifies the technical requirements, test methods, inspection rules, marking, packaging, transportation and storage of valve-regulated lead-acid batteries for communication. This standard applies to scenarios such as base stations, computer rooms, data centers (intelligent computing centers) in the field of information and communications, as well as valve-regulated lead-acid batteries with ultra-fine glass fiber separators. Other valve-regulated lead-acid batteries with similar application scenarios can be used as a reference.

Document data

International classification (ICS): 29.220.

Chinese classification (CCS): K84.

Supersedes the earlier edition YD/T 799-2010.
