What this standard covers

This standard specifies the models, requirements, test methods, inspection rules and markings, packaging, transportation and storage of relayed submarine optical cable splice boxes. This standard applies to the design, manufacture and inspection of connector boxes used in submarine optical cable systems with relays. The joint box used to connect submarine optical cables and land optical cables can also be used as a reference.

Document data

International classification (ICS): 33.180.99.

Chinese classification (CCS): M42.

Supersedes the earlier edition YD/T 814.5-2011.
