What this standard covers

This standard specifies the 900/1800MHz TDMA digital cellular mobile communication network base station subsystem configuration in the structure, function, performance, operation and maintenance, interfaces, mechanical and environmental, power and ground, synchronization requirements and base station radio indicator testing methods. This standard applies to 900/1800MHz TDMA digital cellular mobile communication network base station subsystem.

Document data

International classification (ICS): 33.060.99.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 88,834 words.

Adopted international standard: ETSI EN 301 087, NEQ.

Supersedes the earlier edition YD/T 883-1999.
