What this standard covers

This standard specifies the product classification, requirements, test methods, inspection rules, signs, instructions for use, packaging, transportation and storage of loose-layer stranded outdoor optical cables. This standard is applicable to communication core network of pipelines, direct burial, underwater, non-self-supporting overhead and other conventional laying methods, and layered and layered semi-dry optical cables for access networks. This standard does not apply to micro-cables and all-dry cables of air blowing.

Document data

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 36,395 words.

Supersedes the earlier edition YD/T 901-2009.
