What this standard covers

This standard specifies the communication power equipment, lightning definition, classification, technical requirements, test methods and inspection rules. This standard applies to Communications Authority (station) with AC power distribution equipment, oil machine control system, communication with AC uninterruptible power supplies, communications equipment and communications half rectifier rectifier with high-frequency switching devices. Integrated in the system communication power devices can be implemented by reference.

Document data

International classification (ICS): 91.120.40.

Chinese classification (CCS): M41.

Estimated length of the Chinese original: 12,131 words.

Supersedes the earlier edition YD/T 944-1998.
