What this standard covers

This standard specifies the electromagnetic compatibility (EMC) requirements, measurement methods and performance criteria for telecommunications terminal equipment (TTE) that transmits and receives voice, data, and images. This standard applies to wired telecommunications terminal equipment that sends and receives voice, data, and images of various analog or digital signals. The technical requirements and test methods specified in this standard do not apply to cordless phones and mobile communication terminals.

Document data

International classification (ICS): 33.100.

Chinese classification (CCS): L06.
