What this standard covers

This Standard specifies the copper magnetite copper, total iron, silica, alumina, calcium oxide, magnesium oxide, titanium dioxide, manganese oxide and determination of phosphorus content. This Standard applies to copper magnetite copper, total iron, silica, alumina, calcium oxide, magnesium oxide, titanium oxide, manganese oxide, and the determination of phosphorus content. Measurement range (mass fraction) in Table 1.

Document data

International classification (ICS): 73.060.10.

Chinese classification (CCS): D31.

Estimated length of the Chinese original: 11,112 words.
