What this standard covers

This standard specifies the method for the determination of iron, nickel, zinc and chromium contents of magnetic foreign matter in cobalt tetroxide. This standard is applicable to the determination of iron, nickel, zinc and chromium in magnetite, which is in the range of 0.01g/t ~ 5.0g/t.

Document data

International classification (ICS): 77.120.70.

Chinese classification (CCS): H13.

Estimated length of the Chinese original: 8,868 words.
