What this standard covers

This standard specifies the method for determining the copper-zinc foreign matter content in cobalt tetroxide. This document applies to the determination of the copper-zinc foreign matter content in cobalt tetroxide, with a determination range of 5 mg/kg to 400 mg/kg.

Document data

International classification (ICS): 77.120.70.

Chinese classification (CCS): H13.

Estimated length of the Chinese original: 12,195 words.
