What this standard covers

This standard specifies the raw material quality requirements, classification and marking, technical requirements, test methods, inspection rules, marking, packaging, transportation, storage, accompanying documents and order form contents of anode plate products for hydrometallurgical copper electrowinning. This standard applies to anode plates for hydrometallurgical copper electrowinning produced by smelting, rolling, welding and other processes using lead as the basic raw material, adding tin, antimony, calcium, strontium and other elements to form lead alloys with different alloy ratios.

Document data

International classification (ICS): 77.150.60.

Chinese classification (CCS): H62.

Estimated length of the Chinese original: 13,197 words.

Supersedes the earlier edition YS/T 1089-2015.
