What this standard covers

This standard specifies the classification, technical requirements, test methods, inspection rules, packaging, transportation, storage, and accompanying documents and order forms for iron concentrate recovered from non-ferrous heavy metal smelting slag. This standard applies to iron concentrate recovered from smelting slag generated during the smelting of non-ferrous heavy metals such as copper, zinc, nickel, and cobalt through mineral processing or other methods, primarily used as raw material in the steel industry.

Document data

International classification (ICS): 77.02.

Chinese classification (CCS): H62.

Estimated length of the Chinese original: 7,740 words.

Supersedes the earlier edition YS/T 1092-2015.
