What this standard covers

This standard specifies the product classification, technical requirements, test methods, inspection rules and markings, packaging, transportation, storage, accompanying documents and order contents of recycled zinc raw materials. This standard applies to zinc-containing materials such as steel smoke, zinc smelting slag, waste zinc batteries, waste coatings, zinc ash, etc. generated during metal smelting, galvanizing, and consumption of zinc-containing products. After impurities are removed and enriched, they can be used for the production of recycled zinc and zinc alloy ingots.

Document data

International classification (ICS): 77.150.60.

Chinese classification (CCS): H62.

Estimated length of the Chinese original: 12,177 words.

Supersedes the earlier edition YS/T 1093-2015.
