What this standard covers

This standard specifies the basic safety requirements for safe production of cathodic carbon block for aluminum electrolysis and the requirements for safe operation of equipment and facilities. This standard is applicable to the safety management in the design, construction, installation, production and maintenance and repair of the carbon block production enterprises for aluminum electrolysis.

Document data

International classification (ICS): 71.100.10.

Chinese classification (CCS): Q52.

Estimated length of the Chinese original: 21,247 words.
