What this standard covers

This standard specifies a method for determining the lead and zinc content in copper, lead, and zinc ores (including copper-molybdenum polymetallic ores) and tailings using the Na₂EDTA titration method. This standard applies to the determination of lead and zinc content in copper, lead, and zinc ores (including copper-molybdenum polymetallic ores) and tailings.

Document data

International classification (ICS): 77.120.01.

Chinese classification (CCS): H13.

Supersedes the earlier edition YS/T 1115.2-2016.
