### What this standard covers

This standard specifies the alumina production of single casing Preheat autoclave leaching system heat balance measurement and calculation basis, measuring conditions, determination of the project and methods of computation. This standard applies to the alumina production capacity to supply steam to a single casing preheating autoclave leaching system heat balance measurement and calculation.

### Document data

International classification (ICS): 77.180.

Chinese classification (CCS): H92.

Estimated length of the Chinese original: 10,161 words.
