What this standard covers

This standard specifies the alumina production (including sintering method and combined method) crude liquid desiliconizing system heat balance measurement and the basis of calculation, measurement conditions, measurement items and determination calculation methods. This standard applies to direct steam heating alumina production, continuous or intermittent desiliconizing system thermal balance measurement and calculation.

Document data

International classification (ICS): 77.180.

Chinese classification (CCS): H92.

Estimated length of the Chinese original: 1,212 words.

Supersedes the earlier edition YS/T 119.6-1992.
