What this standard covers

This standard specifies the terms and definitions, codes, and bar code symbology for the coding rules and bar code identification of non-ferrous metal smelting products. This standard is applicable to the compilation of uniform coding and bar code identification for non-ferrous metal smelting products such as cathode copper, aluminum ingot for remelting, zinc ingot, lead ingot, tin ingot and electrolytic nickel. It is used in the production, processing and storage of non-ferrous metal smelting products. Information collection and data exchange in logistics, futures delivery, spot trading and other application links.

Document data

International classification (ICS): 77.120.

Chinese classification (CCS): H01.

Estimated length of the Chinese original: 14,173 words.
