1 Foreword

YS/T 1314.7-2021 was issued by Ministry of Industry and Information Technology on 2 December 2021.

It is one of 8 parts of the YS/T 1314 series.

The YS/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

YS/T 1314.7-2021 is filed under Chinese Standard Classification H13, in the field of metallurgy.

This catalogue holds 1,555 other YS/T standards without an ICS number.

In this catalogue, YS/T standards carry edition years from 1985 to 2026.

3 About this standard

Sector: Nonferrous Metallurgy Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 8 pages (approximate)

Chinese original: about 9,964 characters

4 Related standards

Other parts of this standard:

YS/T 1314.1-2019 - Copper smelting - Determination of silver slag - Part 1: Determination of gold and silver content

YS/T 1314.2-2019 - Copper smelting - Determination of platinum and slag - Part 2: Determination of platinum and palladium content - Fire-inducing method enrichment - Inductively coupled plasma atomic emission spectrometry

YS/T 1314.3-2019 - Copper smelting - Determination of lead content - Part 3: Determination of lead content - Na2EDTA titration

YS/T 1314.4-2019 - Copper smelting - Determination of silver slag - Part 4: Determination of tin content - Potassium iodate titration

YS/T 1314.5-2019 - Copper smelting - Determination of copper slag - Part 5: Determination of copper, bismuth, bismuth, selenium, bismuth and tin content Inductively coupled plasma atomic emission spectrometry

YS/T 1314.6-2021 - Part 6: Determination of copper content. Iodometric method

YS/T 1314.8-2021 - Part 8: Determination of bismuth content Na2EDTA titration method

Standards on related subjects:

GB/T 3884.1-2025 - Methods for chemical analysis of copper concentrates - Part 1: Determination of copper content - Iodine titration method and electrogravimetric method

YS/T 1229.3-2018 - Methods for chemical analysis of crude nickel hydroxide - Part 3: Determination of copper, cobalt, manganese calcium, magnesium, zinc, iron, aluminum, lead, arsenic and cadmium contents - Inductively coupled plasma atomic emission spectrometry

GB/T 3884.2-2012 - Methods for chemical analysis of copper concentrates - Part 2: Determination of gold and silver contents - Flame atomic absorption spectrometric method and fire assay method

5 Classification and status

Chinese Standard Classification (CCS): H 13

Prefix YS/T: recommended standard.
