What this standard covers

This standard specifies the direct current internal resistance (DCIR) test method for lithium nickel cobalt manganate, the cathode active material of lithium-ion batteries. This standard is applicable to the direct current internal resistance (DCIR) test of lithium nickel cobalt manganate, the positive active material of lithium-ion batteries.

Document data

International classification (ICS): 77.160.

Chinese classification (CCS): H21.

Estimated length of the Chinese original: 8,881 words.
