What this standard covers

This standard specifies the method for determination of silver content in high-sulfur slag. This standard is applicable to the determination of silver content in high-sulfur slag. The measurement range of method 1 is 50g/t??500g/t; the measurement range of method 2 is >500g/t??1500g/t.

Document data

International classification (ICS): 77.120.99.

Chinese classification (CCS): H13.

Estimated length of the Chinese original: 17,110 words.
