What this standard covers

This standard specifies the basic principles and methods of diagnosis, diagnosis scope, diagnosis points, work procedures and reporting requirements for energy-saving diagnosis of lead smelting enterprises. This standard applies to lead smelting production enterprises that produce lead ingots and lead alloy ingots using lead concentrate, crude lead, lead-containing waste (lead-containing materials co-disposed of by mineral lead smelting enterprises, as well as waste lead-acid batteries and metallic lead waste) as raw materials. Lead smelting enterprises in this standard include mineral lead smelting enterprises and recycled lead smelting enterprises.

Document data

International classification (ICS): 77.120.01.

Chinese classification (CCS): H01.

Estimated length of the Chinese original: 24,243 words.
