What this standard covers

This standard specifies the product classification, technical requirements, test methods, inspection rules, marking, packaging, transportation, storage, accompanying documents and order form contents of lead-bismuth alloy ingots as smelting byproducts. This standard applies to lead-bismuth alloy ingot products obtained from the smelting and recovery of copper anode mud, Kaldo furnace smelting slag and other lead-bismuth materials, mainly for smelting enterprises to produce lead products and bismuth products.

Document data

International classification (ICS): 77.150.60.

Chinese classification (CCS): H62.
