What this standard covers

This standard specifies the accounting boundaries, measurement requirements, accounting steps and methods, data quality management, report content and format of carbon emission accounting and reporting requirements for silicon polycrystalline production enterprises. This standard applies to the accounting and reporting of carbon emissions of silicon polycrystalline production enterprises. Enterprises whose main business is the production of silicon polycrystalline products can calculate carbon emissions and prepare corporate carbon emission reports according to the methods provided in this standard.

Document data

International classification (ICS): 13.020.10.
