What this standard covers

This standard specifies the classification, technical requirements, test methods, inspection rules, marking, packaging, transportation, storage, and accompanying documents and order forms for titanium-based iridium oxide coated anodes used in electrolytic copper foil production. This document applies to anode products using TAI1G pure titanium as the substrate and various iridium oxides as the coating body in electrolytic copper foil production.

Document data

International classification (ICS): 77.150.50.

Chinese classification (CCS): H64.

Estimated length of the Chinese original: 12,118 words.
