What this standard covers

This standard specifies the method, principle, equipment and tools, test conditions, specimens, test procedures, data processing, and test report for cup testing of copper-steel composite metals. This document applies to cup testing of soft copper-steel composite strips with a thickness of 0.15 mm to 3.60 mm; other metal composite strips can be used as a reference.

Document data

International classification (ICS): 77.040.10.

Chinese classification (CCS): H23.

Estimated length of the Chinese original: 12,120 words.
