What this standard covers

This standard specifies the product classification, technical requirements, test methods, inspection rules, marking, packaging, transportation, storage, and accompanying documents and order forms for the mineral processing reagent butyloxycarbonyl isobutyl thiocarbamate. This standard applies to butyloxycarbonyl isobutyl thiocarbamate products produced from sodium thiocyanate, n-butyl chloroformate, and isobutanol as raw materials. This product is mainly used as a collector in the flotation of non-ferrous metal sulfide ores.

Document data

International classification (ICS): 71.100.40.

Chinese classification (CCS): H34.

Estimated length of the Chinese original: 9,973 words.
