Foreword

YS/T 1854-2026 is a recommended industry standard of the People's Republic of China in the Nonferrous Metals sector, approved and issued by the Ministry of Industry and Information Technology on 15 April 2026, with effect from 1 November 2026.

Classification: ICS 77.150.99; CCS H63.

1 Scope

The document specifies the product classification, technical requirements, test methods, inspection rules, marking, packaging, transport, storage, accompanying documents and order form content for tungsten alloy wire for medical use. It applies to medical tungsten alloy wire made from tungsten blanks produced by powder metallurgy and then processed by pressure working. The document concerns the finished wire as supplied, and it covers how the wire is classified, tested, inspected, marked, packed, transported and stored.

Wire producers, medical device makers who use the wire, purchasers and testing laboratories can use it when defining orders and checking deliveries. It is a voluntary standard (code with /T), issued by the Ministry of Industry and Information Technology on 15 April 2026 and effective from 1 November 2026. It is a new standard.
