Foreword

YS/T 1857-2026 is a recommended industry standard of the People's Republic of China in the Nonferrous Metals sector, approved and issued by the Ministry of Industry and Information Technology on 15 April 2026, with effect from 1 November 2026.

Classification: ICS 77.150.99; CCS H66.

1 Scope

YS/T 1857-2026 specifies the product classification, technical requirements, test methods, inspection rules, marking, packaging, transport, storage, accompanying documents and order form content for indium wire. It applies to indium wire made from indium of a certain purity, melted and cast into ingots and then extruded to a given diameter. The document covers the finished wire as supplied and describes how it is classified, tested, inspected, marked, packed, transported and stored, together with its paperwork.

Indium wire producers, buyers in the electronics and related industries, and testing laboratories can use it to define orders and check deliveries. It is a voluntary standard (code with /T), issued by the Ministry of Industry and Information Technology on 15 April 2026 and effective from 1 November 2026. It is a new standard.
