Foreword

YS/T 1859-2026 is a recommended industry standard of the People's Republic of China in the Nonferrous Metals sector, approved and issued by the Ministry of Industry and Information Technology on 15 April 2026, with effect from 1 November 2026.

Classification: ICS 77.150.99; CCS H63.

1 Scope

YS/T 1859-2026 specifies the technical requirements, test methods, inspection rules, marking, packaging, transport, storage, accompanying documents and order form content for molybdenum-based rotating anode target blanks. It applies to molybdenum-based rotating anode target blanks, the starting material for the rotating anode targets of X-ray equipment. The document covers the blank as a semi-finished product and describes how it is tested, inspected, marked, packed, transported and stored, together with its paperwork.

Blank producers, target and X-ray tube manufacturers, purchasers and testing laboratories can use it when agreeing orders and checking supplied blanks. It is a voluntary standard (code with /T), issued by the Ministry of Industry and Information Technology on 15 April 2026 and effective from 1 November 2026. It is a new standard.
