Foreword

YS/T 1860-2026 is a recommended industry standard of the People's Republic of China in the Nonferrous Metals sector, approved and issued by the Ministry of Industry and Information Technology on 15 April 2026, with effect from 1 November 2026.

Classification: ICS 77.150.30; CCS H62.

1 Scope

YS/T 1860-2026 specifies the classification and designation, technical requirements, test methods, inspection rules, marking, packaging, transport, storage and accompanying documents, and the contents of the order form, for ultra-fine grain tin bronze strip and foil. It applies to ultra-fine grain tin bronze strip and foil used in industries such as connectors, switches and relays.

Manufacturers of copper alloy strip, producers of connectors, switches and relays, test laboratories and purchasers can use it to specify the material, check delivered product and prepare orders. It is a voluntary standard (code with /T). It was approved and issued by the Ministry of Industry and Information Technology on 15 April 2026 and takes effect on 1 November 2026. The translated edition allows overseas buyers and suppliers of this strip and foil to work from the same classification, requirements and order content as their Chinese counterparts.
