Foreword

YS/T 1861-2026 is a recommended industry standard of the People's Republic of China in the Nonferrous Metals sector, approved and issued by the Ministry of Industry and Information Technology on 15 April 2026, with effect from 1 November 2026.

Classification: ICS 77.150.30; CCS H62.

1 Scope

The document specifies the classification and designation, technical requirements, test methods, inspection rules, marking, packaging, transport, storage, accompanying documents and order form content for tellurium copper alloy plate. It applies to tellurium copper plate used in contactors. The document concerns the plate as a copper alloy product and describes how it is classified, designated, tested, inspected, packed, transported and stored. The requirements are written so that suppliers and buyers can refer to one document when specifying this material for contactors.

Plate producers, contactor manufacturers, purchasers and testing laboratories can use it to define orders and verify deliveries. It is a voluntary standard (code with /T), issued by the Ministry of Industry and Information Technology on 15 April 2026 and effective from 1 November 2026. It is a new standard.
