Foreword

YS/T 1862-2026 is a recommended industry standard of the People's Republic of China in the Nonferrous Metals sector, approved and issued by the Ministry of Industry and Information Technology on 15 April 2026, with effect from 1 November 2026.

Classification: ICS 77.150.30; CCS H62.

1 Scope

YS/T 1862-2026 specifies the technical requirements, test methods, inspection rules, marking, packaging, transport, storage, accompanying documents and order form content for copper indium gallium alloy powder. It applies to the alloy powder used to make copper indium gallium targets. The document concerns the powder as a raw material for target production and describes how it is tested, inspected, marked, packed, transported and stored. The requirements are written so that suppliers and buyers can refer to one document when specifying this powder.

Powder producers, target manufacturers, purchasers and testing laboratories can use it when agreeing supply terms and checking deliveries. It is a voluntary standard (code with /T), issued by the Ministry of Industry and Information Technology on 15 April 2026 and effective from 1 November 2026. It is a new standard.
