Foreword

YS/T 1871-2026 is a recommended industry standard of the People's Republic of China in the Nonferrous Metals sector, approved and issued by the Ministry of Industry and Information Technology on 15 April 2026, with effect from 1 November 2026.

Classification: ICS 77.150.99; CCS H62.

1 Scope

The document specifies the product classification, technical requirements, test methods, inspection rules, marking, packaging, transport, storage, accompanying documents and order content for tin oxide obtained as a by-product of smelting. It applies to tin oxide produced as a by-product in tungsten, lead and copper smelting, a product used mainly in tin smelting.

It is used by smelters that produce this by-product, by tin smelters and traders who buy it as feed material, and by laboratories that inspect it. As a YS/T standard it is voluntary. It was approved by the Ministry of Industry and Information Technology, issued on 15 April 2026 and takes effect on 1 November 2026. It is a new standard.
