What this standard covers

This standard specifies the sodium antimony (also known as sodium pyroantimonate) requirements, test methods, inspection rules, marking, packaging, transport and storage, quality certificates and contracts (or orders) content. This standard applies to antimony trioxide or antimony concentrate as raw material to produce sodium antimonate. The products are mainly used for CRT glass, optical glass, and other glass clarifying agent, can also be used in enamel, ceramics and flame retardants and other industries.

Document data

International classification (ICS): 71.060.50.

Chinese classification (CCS): G12.

Estimated length of the Chinese original: 19,118 words.

Supersedes the earlier edition YS/T 22-1992.
