What this standard covers

This standard specifies the composition, equipment, pipeline layout, test procedures, data collection and calculation of the test system for full tailings backfilling in gold mines. This standard is applicable to the full tailings filling loop test of gold mines and the measurement and analysis of the parameters such as mass concentration, flow rate and pressure of filling slurry transport.

Document data

International classification (ICS): 73.060.01.

Chinese classification (CCS): D46.

Estimated length of the Chinese original: 13,186 words.
