What this standard covers

This standard specifies the method for determining the silver correction ratio of metallic ores, concentrates and corresponding materials by the fire assay method. This standard applies to the determination of the silver correction ratio of metallic ores, concentrates and corresponding materials by the fire assay method (except for samples containing platinum group elements and bismuth).

Document data

International classification (ICS): 73.060.99.

Chinese classification (CCS): D46.

Estimated length of the Chinese original: 8,814 words.
