What this standard covers

This standard specifies a method for determining the free carbon content in chromium carbide using high-frequency combustion infrared absorption. This document applies to the determination of the free carbon content in chromium carbide, with a determination range of 0.020% to 1.000%.

Document data

International classification (ICS): 77.16.

Chinese classification (CCS): H16.

Estimated length of the Chinese original: 10,120 words.
