What this standard covers

This standard specifies the requirements for high purity tin, test methods, inspection rules and signs, packaging, transport, storage, quality certificate and a contract (or order form) content. This standard applies to more than 99. 90% of tin and tin as raw material refined by electrolysis and other processes to obtain the purity of not less than 99. 999% tin, tin to Sn-05 as raw material purification and other craft Czochralski crystal purity obtained not less than 99. 9999% and 99. 99999% tin. Products for preparing high purity alloys, compound semiconductor, superconducting material, solder dopant and a compound semiconductor, target of indium tin oxide (ITO) and the like.

Document data

International classification (ICS): 77.150.60.

Chinese classification (CCS): H62.

Estimated length of the Chinese original: 6,620 words.

Supersedes the earlier edition YS/T 44-1992.
