What this standard covers

This standard specifies the aluminum powder in oil (stearic acid) content determination method. This standard applies to the determination of aluminum in the stearic acid. Measuring range (mass fraction): 0. 10% ~ 4. 0% of the wet milling method is not suitable for the analysis of aluminum powder, otherwise there is the possibility of fire or explosion.

Document data

International classification (ICS): 77.040.30.

Chinese classification (CCS): H21.

Estimated length of the Chinese original: 8,885 words.
