What this standard covers

This standard specifies the methods for determining the air reactivity of prebaked anodes and side carbon blocks by mass loss method and thermogravimetric method. This standard applies to the determination of air reactivity of prebaked anodes and side carbon blocks, and other carbon products for aluminum can be used as a reference.

Document data

International classification (ICS): 71.100.10.

Chinese classification (CCS): Q52.

Estimated length of the Chinese original: 12,136 words.

Supersedes the earlier edition YS/T 63.11-2006, YS/T 63.23-2012.
