What this standard covers

This standard specifies the grade, chemical composition and chemical composition analysis of molybdenum and molybdenum alloy products. This standard applies to various molybdenum and molybdenum alloy products (including sintered billets, ingots and semi-finished products) for smelting, powder metallurgy and pressure processing.

Document data

International classification (ICS): 77.120.

Chinese classification (CCS): H63.

Estimated length of the Chinese original: 6,631 words.
