### What this standard covers

This standard specifies the requirements for magnesium fluoride, test methods, inspection rules, packaging, labeling, transportation, storage and contracts (or orders) content. This standard applies to the production of electrolytic aluminum additives used in the production of magnesium metal magnesium fluoride flux. For optical lens coating, titanium pigment coating agent, cathode-ray screen fluorescent materials, advanced ceramics, glass and fluorine chemicals and other high-tech fields with magnesium fluoride may also refer to the implementation of this standard.

### Document data

International classification (ICS): 77.040.30.

Chinese classification (CCS): H12.

Estimated length of the Chinese original: 6,615 words.
