What this standard covers

This standard specifies the filler aluminum hydroxide measured conductivity measurement principle, the instrument requirements, test conditions, test procedures and test reports. This standard applies to aluminum hydroxide for filler Determination of electrical conductivity. Measuring range: $> 5 \mu\text{S/cm}$.

Document data

International classification (ICS): 71.060.40.

Chinese classification (CCS): H12.

Estimated length of the Chinese original: 6,685 words.
