What this standard covers

This standard specifies the technical requirements, test methods, inspection rules, marking, packaging, transportation, storage, accompanying documents, and order form contents for recycled silicon raw materials. This document applies to silicon materials generated during the production, processing, and use in the photovoltaic or semiconductor industry, and is used for the production of silicon monocrystalline products in the photovoltaic industry.

Document data

International classification (ICS): 29.045.

Chinese classification (CCS): H82.

Estimated length of the Chinese original: 7,730 words.

Supersedes the earlier edition YS/T 840-2012.
