What this standard covers

This Standard specifies the method for the determination of high-purity gallium oxide content of impurity elements. This Standard applies to the determination of high-purity gallium oxide, sodium, magnesium, calcium, titanium, vanadium, chromium, manganese

Document data

International classification (ICS): 77.040.30.

Chinese classification (CCS): H17.

Estimated length of the Chinese original: 10,150 words.
