What this standard covers

This Standard specifies the magnesium, aluminum, iron, nickel, copper, zinc, silver, cadmium, tin, lead element content determination method of 99.999% - 99.9999% high purity indium. This section applies to the determination of high-purity indium magnesium

Document data

International classification (ICS): 77.040.30.

Chinese classification (CCS): H17.

Estimated length of the Chinese original: 8,829 words.
