What this standard covers

This Standard specifies the method for determination of antimony doped tin oxide in the amount of chlorine. This section applies to the determination of antimony tin oxide doped amount of chlorine measurement range (mass fraction) of 0.030% to 0.40%.

Document data

International classification (ICS): 77.120.60.

Chinese classification (CCS): H13.

Estimated length of the Chinese original: 6,640 words.
